

Rebates from Avista & Energy Savings... The Best Way to Satisfy Your Customer!

Customers who choose high efficiency over standard equipment will enjoy significant savings in operating costs. With rebates from Avista, the payback period on their investment will be even shorter. When you talk to customers about the benefits of high efficiency equipment, remember to share these important points:

- Rebates help offset costs
- Rebates range from \$50 to \$3,000
- Lowers customer's energy bill
- Makes the building/home more comfortable
- Adds value to the building/home

RESIDENTIAL EQUIPMENT

Heating Equipment

To qualify, forced air furnaces and boilers must have an Annual Fuel Utilization Efficiency (AFUE) of 90% or higher. Direct vent space heaters must have an AFUE of 80% or higher. To receive an additional bonus incentive, install a qualifying high efficiency water heater within 30 days of the furnace, boiler or space heater installation.

Furnace	Rating	Rebate
Forced Air Furnace, Boiler	90% min. AFUE	\$200
Direct Vent Space Heater	80% min. AFUE	\$150
Heating & Water Heater Bonus		\$100

Programmable Thermostats & Chimney Dampers

Thermostats must have either 7-day or 5-day/2-day programming along with a change/check filter reminder, and must control the natural gas heating system. Chimney dampers must be installed on a roof top of open wood burning fireplace chimney and **MUST** be installed by a licensed contractor. No other combustion devices may utilize the chimney.

Equipment	Type	Rebate
Thermostat	7 or 5/2 Day with Filter Reminder	Up to \$50
Damper	Roof top of open wood-burning fireplace	\$100

Rebates cannot exceed measure cost.

Water Heaters

To qualify, the minimum Energy Factor (EF) for 40 gallon tank water heaters must be 0.62, and 50 gallon water heaters must be 0.60. Tankless water heaters must have an Annual Fuel Utilization Efficiency (AFUE) of at least 80%. To receive an additional bonus incentive, install a qualifying high efficiency furnace, boiler or space heater within 30 days of the water heater installation.

Water Heater	Rating	Rebate
40 Gallon Tank	.62 EF	\$50
50 Gallon Tank	.60 EF	\$50
Tankless	80% AFUE	\$200
Heating & Water Heater Bonus		\$100

RESIDENTIAL EQUIPMENT PROGRAM BASICS:

- Natural gas must be the main source of heat.
- Install qualifying equipment.
- Download the Oregon Residential Equipment Rebate Form at www.everylittlebit.com.
- Follow the instructions on the form, attach copies of invoices or receipts and mail to Avista.
- Efficiency ratings must be listed on one of the following web sites: www.oregon.gov/energy or www.ahridirectory.org

RESIDENTIAL WEATHERIZATION

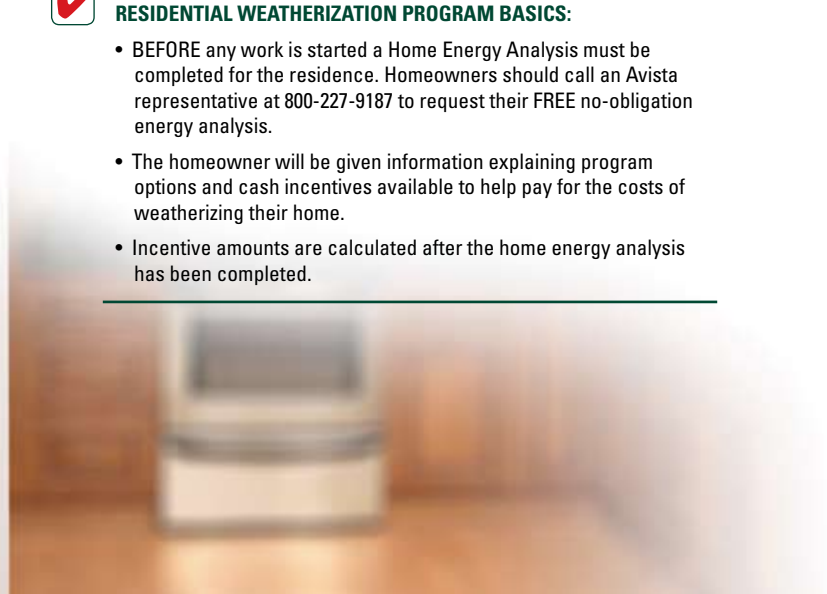

It's Wise to Weatherize—Now, More Than Ever!

Substantial cash incentives are available to help pay for improving the energy efficiency of residential homes heated by natural gas from Avista. If the home was built before 1980, the attic, walls or floor may be under-insulated. Avista will also pay up to \$2.25/sf to replace old single-pane windows with more efficient double-pane windows when installed in conjunction with attic, wall or floor insulation. Other weatherization measures available for cash incentives are duct insulation, water pipe insulation, caulking and weather-stripping.

RESIDENTIAL WEATHERIZATION PROGRAM BASICS:

- **BEFORE** any work is started a Home Energy Analysis must be completed for the residence. Homeowners should call an Avista representative at 800-227-9187 to request their **FREE** no-obligation energy analysis.
- The homeowner will be given information explaining program options and cash incentives available to help pay for the costs of weatherizing their home.
- Incentive amounts are calculated after the home energy analysis has been completed.

COMMERCIAL INCENTIVES

Commercial High Efficiency Gas Heating

To qualify, the new natural gas furnace must have an AFUE of at least 91% and a maximum MMBTU of 135. For larger furnaces or boilers, contact Avista for a "site specific" evaluation (see below).

FURNACE	RATING	REBATE
Maximum 135 MMBTU	AFUE minimum 91%	\$200

Insulation

To qualify, the building being insulated must be heated with natural gas, be no larger than 5000sf and have no more than three floors. If the building does not meet these requirements, please contact Avista and request a "site specific" evaluation (see below). Where practical, the final attic insulation value must be R30, and floors R21. If insulating walls, the wall cavity must be filled.

MEASURE	EXISTING INSULATION	INCENTIVE PER SF
Attic Insulation	R0 to R11	\$0.45
Attic Insulation	R12 to R19	\$0.29
Attic Insulation	R20 and Above	\$0.17
Wall Insulation	R0	\$0.75
Floor Insulation	R0	\$0.63

Grocery/Retail Refrigeration Night Curtains

To qualify, natural gas must be the main source of heat. In addition, the refrigeration compressors must be located outside of the heated space.

MEASURE	INCENTIVE PER LF
Display Case Night Curtains	\$21
Coffin Freezer Night Covers	\$5

Site Specific Energy Evaluations

Substantial cash incentives are available for many natural gas energy efficiency projects that fall outside the parameters of our prescriptive programs. We can help identify cost effective opportunities that may increase efficiency for processing and manufacturing plants, large buildings over 5000 square feet, boilers, condensing water heaters, controls, insulation, new construction built above code, and other unique commercial applications.

SITE SPECIFIC PROGRAM BASICS:

- To be eligible for site-specific incentives contact Kerry Shroy at kshroy@avistacorp.com or call 541-858-4743 before your project begins.
- Incentives are calculated after a study is completed for the proposed efficiency measure and project costs are determined.

Kitchen Equipment

Cash incentives are available for fryers, ovens, griddles, steam cookers, and commercial dishwashers. To qualify, natural gas equipment must be purchased new and be either ENERGY STAR® rated or shown in the list of qualifying equipment maintained by Avista. The list can be found at: www.everylittlebit.com.

MEASURE	INCENTIVE
Gas Fryer*	\$1,200
3 Pan Steam Cooker*	\$1,000
4 Pan Steam Cooker*	\$1,200
5 Pan Steam Cooker*	\$1,500
6 Pan Steam Cooker*	\$1,800
10 Pan Steam Cooker*	\$3,000
Convection Oven*	\$800
Combination Oven	\$1,000
Single Rack Oven	\$1,500
Double Rack Oven	\$2,500
Gas Griddle*	\$200

* ENERGY STAR Models Available

Dishwashers

To qualify, equipment must be purchased new and be ENERGY STAR rated. A list of qualifying dishwashers can be found at: www.everylittlebit.com

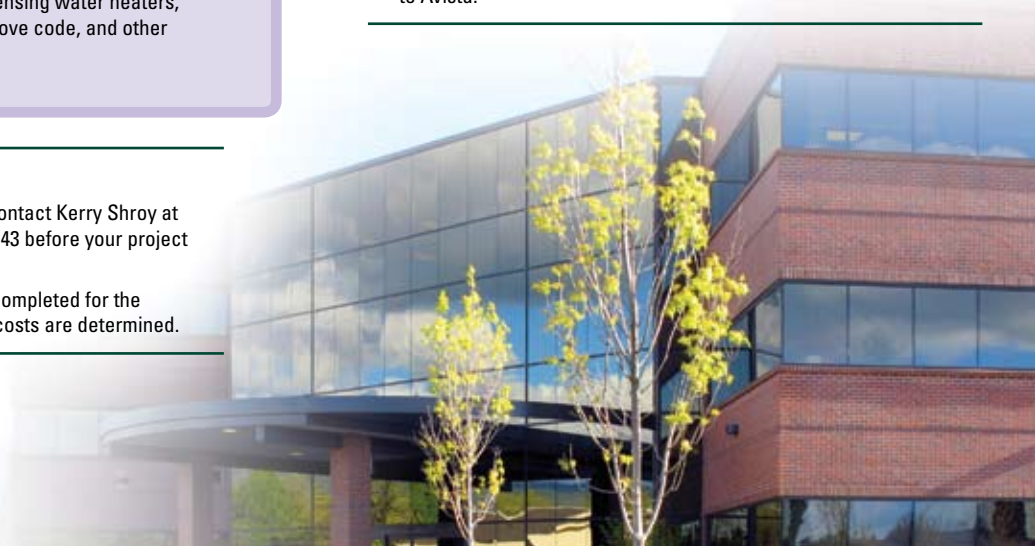

In order to receive an incentive for commercial dishwashers, water must be heated with natural gas from Avista.

MEASURE	INCENTIVE
Door High or Low Temp	\$1,000
Multi Tank Conveyor High or Low Temp	\$2,000
Single Tank Conveyor High or Low Temp	\$1,300
Under-Counter High Temp	\$500

COMMERCIAL INCENTIVES PROGRAM BASICS:

- Install qualifying equipment or insulation.
- Download the Oregon Commercial Prescriptive Incentive Form from www.everylittlebit.com.
- Follow the instructions on form, attach copies of invoices and mail to Avista.

AVISTA IS YOUR PARTNER IN ENERGY SAVINGS SOLUTIONS.

Program subject to change without notice. Current program guidelines and incentive forms can be found at www.everylittlebit.com. Some equipment and insulation measures may also qualify for state and federal tax credits. Go to www.oregon.gov/energy and www.energystar.gov for additional information. Commercial incentives are available for customers on rate class 420 and 424. For more information on Avista's residential and commercial rebates and incentives contact Debby Reid at 541-858-4779 or email debby.reid@avistacorp.com
